# USER GUIDE

## MagusUke Ukulele Preamp

## MagusUke Quick Start

1. When the output line is connected to MagusUke, it will start automatically. When the output line is pulled out, it will shut down automatically.

## MagusUke Controls

1. Volume - For the cleanest signal, set the volume knob as high as possible, without causing distortion or feedback.
2. Tone - Push tone to adjust high frequency.
3. Tuner - Play a single note by your instrument, the string number and note name will shown on the display.

The light and indicator change as following:

Meter In Initial Position: Tuner Standby

Meter In Center: The Note Is In Tune

Meter Points Left: Note Is Flat (Too Low)

Meter Points Right: Note Is Sharp (Too High)

## Specification

Nominal Input Level: -20dBV
Input Impedance: $>$ 1M Ohm
